

## JTC awards contract

JTC Corporation (JTC) has awarded a contract to operate and manage the new offshore marine centre to Jurong Port for three years.

The centre occupies 13ha of land and is an infrastructure innovation conceived and developed by JTC to overcome Singapore's scarce waterfront resources and to tap new growth opportunities.

The centre, under construction now, is expected to be fully operational by January next year.

It will be the first common user facility of its kind to cater to the needs of the wide spectrum of manufacturing companies in the offshore and marine sector.
